- Designed for scanning more than 1,00,000 pages/month

Overview...

Digitizing & Publishing Solution

**Webgenic
eLibraryPlus
Server**

Publishing: Webgenic eLibraryPlus Server

- Create digital library from scanned publications
- Self create new digital publications
- On-Premise or Cloud-Based deployment

Overview ...

Significance of eLibraryPlus Server

- Scanner completes half the task in digitization project
 - Produces digital (PDF) version of print publication
- Once you scan thousands of print publications into PDFs, how do you manage them?
 - Just copying scanned PDFs into a folder is not very useful
- You need to be able to store, catalog, categorize, search, distribute, display, and protect your digitized publications.

Overview ...

Significance of eLibraryPlus Server

- The need of managing digitized publications (scanned PDFs) is addressed by document management software.
- Hence we provide a complete solution consisting of scanner hardware and document management server software.
- **Webgenic eLibraryPlus Server** software fulfills all document management needs of digital publications.

Introduction to Digitization Product

ScanCraft High Speed Book Scanner

- The first-of-its-kind, commercially available "Made in India" product for digitization projects
- High speed scanning of books and documents
- Designed for scanning more than 1,00,000 pages/month
- Non-destructive digitization of content
- V-shaped cradle: Specifically designed to handle delicate & precious old books and documents
- Scans up to A3 sized publications

Introduction to Digitization Product ...

ScanCraft High Speed Book Scanner

- Uses high quality components compliant with international standards
- Timer based auto-scanning for higher productivity
- Extensive post-scan processing features:
